

Business Continuity Planning (BCP)

Service Definition

Enterprise Architects (EAL) Business Continuity Planning (BCP) service helps organisations to develop their Business Continuity provision and then have an ongoing role in supporting the client keeping their Business Continuity Management System up to date. EAL has carried this service out for organisations who either want to be aligned to ISO22301 or who have a requirement to certify themselves to the standard. Cost effective service, especially for organisations who cannot justify the cost of a full time Business Continuity Manager.
