

Enterprise Architecture Capability Development

ENTERPRISE ARCHITECTS

Service Definition

Enterprise Architects (EAL) Enterprise Architecture Capability Development (EACD) service helps clients to rapidly establish a mature EA capability. Our EACD practice is our signature product used by over 100 global clients to cost effectively achieve an integrated, value adding EA function. Armed with a wealth of best practice methods, techniques and frameworks using our BLEAM™ (Benefits Led Enterprise Architecture Method) within a six phase approach. Clients usually achieve CMMI level 3/4. Typical outcomes of EACD implementation are an EA function integrated with change management, business strategy linked transformational roadmaps and an EA tool and repository of accurate content.

How we deliver this service

Each phase incrementally evolves the EA capability. EAL pragmatically selects, develops and applies value adding parts of TOGAF™ with essential architecture artefacts needed to interpret corporate strategies to establish an Architecture Vision; provide an accurate view of the Baseline Architecture that is managed and monitored by effective EA governance processes; scientifically determine the Target Architecture, gap analysis and impact assessment detailing projects/work packages in a transformational roadmap. You will be able to sustain the capability through mentoring and skills transfer.

Typical Deliverables

Phase 1: EA Project Initiation and Mobilisation

Phase 2: Establish EA Governance

Phase 3: Baseline EA

Phase 4: Target EA

Phase 5: Transformation Roadmaps

Phase 6: EA Sustainability

Optional: Business Case Development

Optional: EA Training
