

Service Definition

Enterprise Architects (EAL) Enterprise Integration services deliver capabilities and offerings that provide clients with a clear view of strategic, operational, and tactical solutions to drive mission success. Our Enterprise Integration methodology supports organisations in linking together business processes and integrating business systems regardless of where you are within the project or system lifecycle. EAL are experts in Service Oriented Architecture (SOA). EAL have implemented Enterprise Integration solutions across all major vendor platforms.

How we deliver this service

EAL will review and assess the project requirements to determine the appropriate Enterprise Integration architecture styles and patterns such as:

- Developing an Enterprise Integration Strategy
- Implementing a Service Oriented Architecture
- Developing Integration requirements
- Developing an Integration roadmap
- Evaluating Integration platform options and recommending a suitable platform considering the Integration requirements
- Implementing an Enterprise Integration platform
- Moving from a series of point to point integrated systems to a streamlined single common solution that integrates the business processes, data and systems
- Capturing and documenting existing interfaces into an Interfaces Catalog
- Documenting Interface Specifications
- Recommending Integration Architecture and Design patterns
- Developing the “As Is” Integration Architecture and the “To Be” Integration Architecture
- Capturing the Integration design in an architecture tool

Typical Deliverables

Enterprise Integration Strategy

Service Oriented Architecture

Interfaces Catalog

Enterprise Integration Platform

Enterprise Integration Viewpoint

Interface Specifications
