

Service Definition

Enterprise Architects (EAL) Managed Architecture Service (MAS) provides an outsourced on demand flexible workforce of highly skilled architects. MAS is our most popular service amongst our clients as it addresses many of the challenges faced when hiring contract labour and offers assurance of quality, performance and consistency of approach at an affordable price point. We embed a core team of Managed Architects who are hand-picked, equipped, formally trained, on boarded, performance measured and supported by world class architecture methods.

How we deliver this service

A Managed Architect is:

- Sourced, assessed, qualified and hand-selected
- On-boarded with a comprehensive orientation about the organisation and project
- Performance reviewed by our team – weekly checkpoint meeting
- Provided with quality assurance review of work products
- Given access to higher and broader levels of architectural expertise
- Has TOGAF® 9 training and certification
- Domain focused: Enterprise, Business, Information/Data, Applications, Technical and Security
- Skills focused: If specific skills are required such as SAP, Oracle, IBM, Microsoft, Salesforce and Open Source (various)
- Guaranteed to satisfy project requirements
- Able to be rotated mid-project allowing competencies to be continuously aligned with changing project requirements
